MORE REASON TO LOVE THE SUN

HOW FEED IN TARIFF WORK

INSTALLATION

1

Design & Consultation

We know every home and buildings is different. Our knowledgeable solar consultants will work with you to meet your energy needs, financial goals and architectural style. We will conduct a site audit for proposed installation site before drafting a set of energy and financial analysis report based on your needs.

2

Solar Financing

It is now affordable for everyone to go solar without the high initial installation cost. With low downpayment to pay upfront, harnessing the power of the sun for your home is fast and easy on your pocket.

3

Installation & Project Management

A professional installation team ensures that your installation is of the best quality and highest standard. We use only the industry's best solar modules and components.

4

Solar Monitoring

Our service team keeps a watchful eye on your system output data to make sure that the system is always performing as it should be.

1. Real Time Monitoring
2. Weekly check for your system performance
3. Notification Service

? How we take care of you

Your solar system are monitor by us using data logger which transmit output data electronically and send through internet connection.
